EDUCATION

Dr. Babasaheb Ambedkar Technological University *2022- 2026*
B.Tech in Computer Science and Engineering (AI & ML) CGPA : 7.45

SKILLS

- **Python:** NumPy, Pandas, Matplotlib, Seaborn, SciPy, Scikit-learn, TensorFlow, PyTorch ,BeautifulSoup
- **Languages:** Python , Java , C++, C , javaScript, Bash, HTML,CSS
- **Framework:** React, Flask, Flutter, Django, Bootstrap, Node.js, FastAPI, Next.js
- **Tools & Platforms:** GitHub, Docker, Kubernetes, Linux, Figma, Power BI, AWS, Git , Jenkins, Streamlit Cloud, Render

INTERNSHIP

Sunshine Solar Company— Web Developer (Freelance) Jan 2025 – Apr 2025

- Designed and developed the official company website for a solar panel installation startup.
- Implemented dynamic backend using **PHP & MySQL**, integrated **EmailJS** for client inquiries.
- Improved customer engagement and streamlined communication, resulting in 30% faster client response time.

Allore Tech — Full Stack Developer Intern Dec 2025 – Feb 2026

- Developed an "**Automatic Question Paper Generation System"** that generates exam papers dynamically based on selected topics and application requirement for specific publication books .
- Built **"Sekho with AI"**, an educational platform that takes chapter theory from books and generates **AI-based mind maps** to help students visualize and understand concepts easily.
- Implemented **responsive user interfaces and backend APIs**, improving application performance and enabling smooth interaction between frontend and backend systems.

PROJECTS

HealthAI Chatbot

- **Description:** An AI-powered healthcare assistant capable of answering real-time medical queries and providing conversational support to users.
- **Link:** https://healthai-bot-abhishekakurhade.streamlit.app/
- **Role:** AI/ML developer; integrated OpenAI models with a Streamlit frontend for interactive query handling.
- **Technologies Used:** OpenAI API, Python, Streamlit.
- **DevOps Implementation:** Built and implemented a **CI/CD pipeline using Jenkins on AWS EC2**, enabling automated testing, containerization, and seamless deployment of the HealthAI Chatbot.
- **Outcome:** Successfully deployed chatbot that improved accessibility to basic healthcare information and showcased AI-driven conversational solutions in healthcare.

Task Manager Web Application

- **Description:** A full-stack web application that enables users to manage tasks with features like add, update, delete, and track progress in a clean, modern interface.
- **Link:** https://taskmanagers-tf04.onrender.com/
- **Role:** Full-Stack Developer, responsible for architecture design, frontend development, authentication integration, and deployment.
- **Technologies Used:** React, Tailwind CSS, Firebase Authentication, Firestore Database, Render.
- **Outcome:** Successfully built and deployed a secure, responsive, and user-friendly task management platform with real-time data updates and authentication support.

ACTIVITIES

- Led 3-member team in *DIEMS SHODH Event* on **IoT Smart Irrigation System**, enabling automated irrigation with real-time monitoring.
- Completed **Virtual Software Development Internship** with ***J.P. Morgan***, gaining hands-on experience in software engineering practices, financial data visualization, and debugging tasks.
